PROFILE SUMMARY

Am a highly motivated and results-driven individual with a B.Sc. in Aquaculture and Fisheries Management. Possessing a strong foundation in aquatic biology, sustainable farming techniques, fish health management, and resource conservation. With proven ability to apply theoretical knowledge to practical situations, including water quality analysis, hatchery management, and stock assessment. Seeking to leverage my skills in sustainable aquaculture production, policy implementation, and contribute to increasing production efficiency, ensuring responsible resource management, and developing innovative farming system at your reputable organization.
